

2026 incident log

FDC CONFIDENTIAL - SYNTHETIC DEMO DATA

April 17, 2026 - SEV-2 Inventory sync latency - 47 minutes.

Impact: 83 customers saw inventory updates delayed by up to 21 minutes. No data was lost.

Root cause: uneven queue partition load after a high-volume customer import.

Resolution: rebalanced partitions and added automatic hot-partition detection.

Follow-up owner: Priya Raman. Completed May 15.

February 3, 2026 - SEV-2 Authentication degradation - 19 minutes.

Impact: 11% of login attempts failed in the US-West region.

Root cause: an expired signing certificate was not replaced after rotation automation failed.

Resolution: replaced the certificate and added a 30-day rotation alert.

Follow-up owner: Theo Grant. Completed February 10.

Prior incident and service levels

FDC CONFIDENTIAL - SYNTHETIC DEMO DATA

November 21, 2025 - SEV-3 Analytics data freshness - 2 hours 14 minutes.

Impact: 126 customers saw dashboards lag by one reporting cycle.

Root cause: a warehouse job retried indefinitely after a schema change.

Resolution: restarted the job and moved freshness checks ahead of dashboard publication.

Follow-up owner: Mara Chen. Completed December 5.

The analytics freshness incident affected the most customers: 126.

The inventory latency incident was the most severe 2026 customer-facing data incident.

Q1 2026 SERVICE LEVELS

RelayOS availability: 99.96%. LedgerLens availability: 99.98%.

Inventory sync p95 latency: 4.8 seconds. API p95 latency: 310 milliseconds.

Mean time to recovery for SEV-2 incidents: 33 minutes.
